Front end flow structure	6
Database	7
App screenshots	8-9
Refrences	10

TECHNOLOGIES USED

Backend : Laravel 10.10 , Php 8.2.12

Frontend : Bootstrap 5.3.3 , jquery , javascript, HTML , CSS

Database : MySql 8 ,

External API's : Google Cloud speech 1.14 , Open Ai - php 0.7.5

Version Control : Github Desktop

Libraries : starter bootstrap, openAI-php client, doctrine (ORM Library)

Template Engine : Laravel Blade

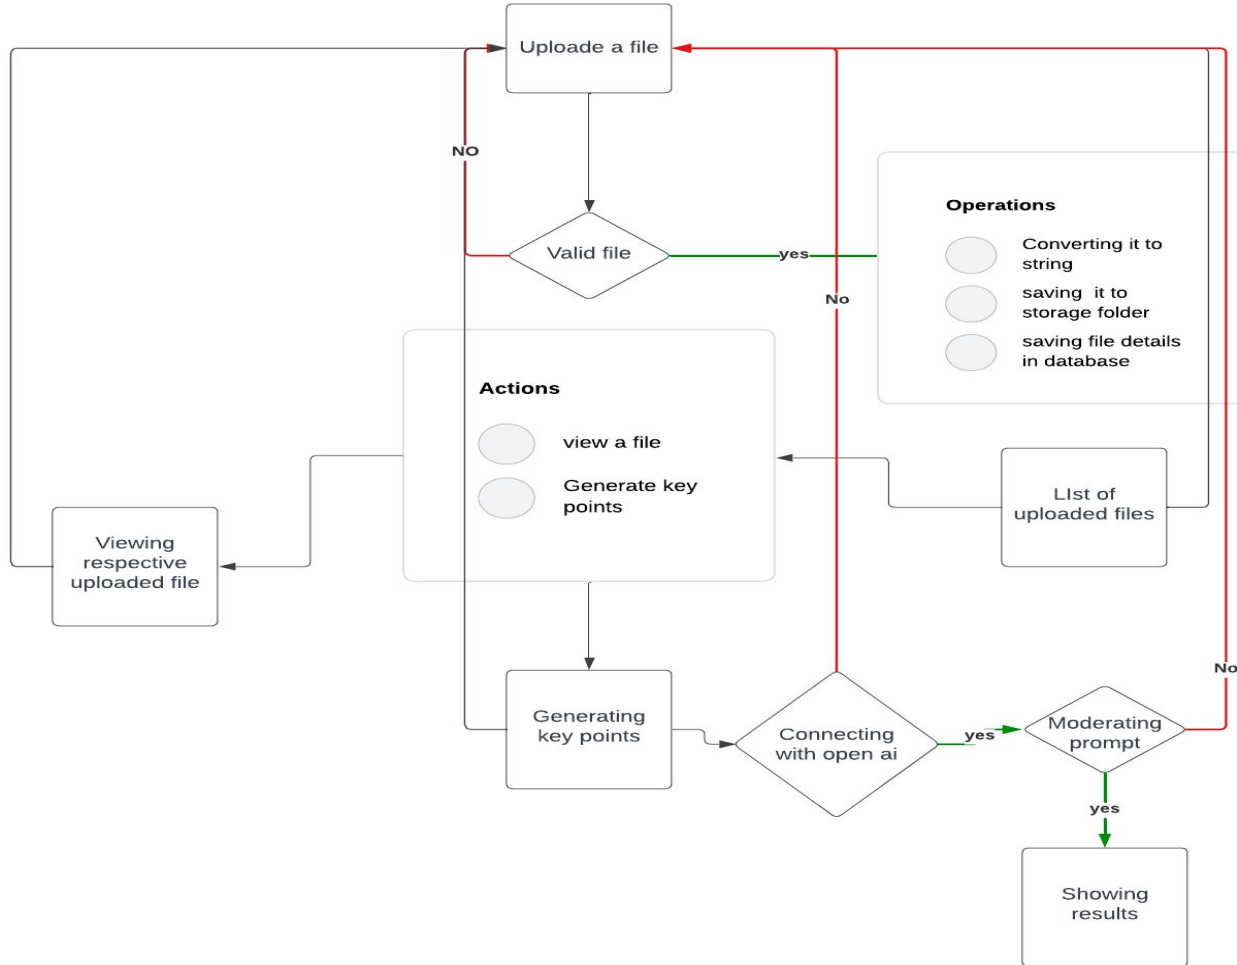

Flow structure : lucid charts

Project Set up

- Install php > 8
- Unzip SummaryApp and open the folder in your IDE
- uncomment pdo_mysql in php.ini in root folder, where you installed the php
- runsql script provided with the folder in your database and the add the database details in .env file.
Before running the project, your mysql server should be running.
- download the ssl crt and copy its path, put it in the value of curl.cainfo = "ssl certificate path" in php.ini. It's necessary use ssl to connecting with open-ai and google cloud.
- Now run , php artisan serve to run the project. It will show you the link of base url in terminal output
- If you get the error of any dependency , run 'composer install '.
- If still dont run, use command 'composer dump-autoload'

Database

Database structure

Prince Bhati | November 6, 2023

we can also have table for key points aswell ,

File	
<i>id</i>	Primary key
<i>file_name</i>	varchar
<i>file_path</i>	varchar
<i>uploaded_at</i>	datetime

Summary	
<i>id</i>	Primary key
<i>file_name</i>	varchar
<i>file_path</i>	varchar
<i>file_id</i>	int
<i>created_at</i>	datetime
